AH-IDR-32	$5,999.00	Allen & Heath 32x16 mix rack

Allen & Heath 64 Channel Dante Interface Card

DanteTM is a ground breaking, Ethernet compliant audio networking technology developed by Audinate to satisfy the increasing demands of the live sound industry for high performance audio, routing flexibility and affordable direct to computer recording. It uses CAT5 cable and standard networking components to distribute multiple streams of audio plus integrated control data with sub millisecond latency.

M-Dante is one of a range of digital audio networking options available for iLive and GLD to enable integration with other systems, digital mic splitting, multi-track recording and system expansion. It implements the new Brooklyn II chipset from Audinate which takes Dante technology to a new level with a full 64 channels of bi-directional audio. It can be fitted to the Port B expansion slot in iLive fixed format MixRacks (iDR-16, iDR-32, iDR-48, iDR-64) or expander (xDR-16), Port A/B in iLive modular MixRacks (iDR0, iDR10) and Port A of iLive modular surfaces if they are fitted with the new RAB-2 standard. It can also be fitted to the I/O Module expansion slot in a GLD-80 mixer.

Order No.	Price	Title
AH-M-DANTE-A	$1,599.00	Allen & Heath 64 Channel Dante Interface Card

AH-Qu-32	$3,699.00	Allen & Heath Qu-32

Allen & Heath Personal Monitor Mixing Station ME-1

The ME-1 Personal Mixer puts the musician in control of their own monitor mix. Each performer can be given a tailored setup that works perfectly for them, whether they crave maximum control over the fine details of their mix or just want the minimum of keys to press. Operation is intuitive and elegant, with simple controls, clear visual feedback and custom naming for instant familiarity.

ME-1 is the cornerstone of the ME Personal Mixing System and is ready to use with the Allen & Heath iLive and GLD series digital mixers. ME-1 is complemented by the ME-U hub, which opens up the benefits of ME to users of other professional digital mixers via Dante, EtherSound or MADI. ME-1 also has an Aviom® compatibility mode for use with Aviom® Pro16® systems.

Equally at home on stage, in rehearsal rooms, houses of worship or recording studios, with ME everyone benefits from slicker soundchecks, lower sound levels on stage and quicker setups, while the engineer will be saving precious buses on the mixer and cutting the time spent tweaking monitor mixes. Whether you are monitoring on headphones, wired or wireless in-ears, using drum thrones or local speakers, the ME Personal Mixing System offers access to an unprecedented number of channels, rugged Allen & Heath construction and unrivaled sound quality.

Allen & Heath Ultra Compact Digital Mixer Qu-Pac-32

Qu-Pac takes the power and legendary quality of the Qu family and shrinks it into an uber-compact desk or rack mount format. Qu-Pac frees you to mix from your iPad, but the full functions of the mixer can also be accessed from the front panel and touchscreen.

With custom settings and Cat5 expansion up to 38 inputs, Qu-Pac provides a scalable, failsafe solution for hardworking bands, schools, hotels, corporate events, live music bars, conferences, personal mixing and many more scenarios requiring a pro mixing solution in a tiny footprint.

User permissions and the customizable Qu-Control screen make Qu-Pac convenient and safe for day-to-day use by non-technical staff.
